

Active compound combinations having insecticidal and acaricidal properties

A b s t r a c t

The novel active compound combinations of N^2 -[1,1-dimethyl-2-(methylsulphonyl)ethyl]-3-iodo- N^1 -{2-methyl-4-[1,2,2,2-tetrafluoro-1-(trifluoromethyl)ethyl]phenyl}phthalamide of the formula (I) and the active compounds 1 to 15 listed in the description have very good insecticidal and acaricidal properties.
